The cornerstone programs of Madonna's Center are inspired by and grounded in a set of common core beliefs which are firmly held by all of our Board Members, Volunteers and Paid Staff, as outlined in the creed below:

We, at Madonna's Center, believe that a healthy community can be achieved only if every person is granted the fundamental right to life and has equal access to the levels of well-being necessary for full human development and dignity - starting with food, safe shelter, clothing, education, health care, meaningful employment, and good working conditions.

We believe, in particular, the disadvantaged members of society, should be given opportunities to become active participants in the decisions and policies which most affect the quality of their lives.

We believe that our responsibilities to each other, in the human family, transcend differences in age, race, ethnicity, nationality, socioeconomic status, religious beliefs and ideologies.

Do you understand and agree with these belief statements? Yes No Somewhat
